The MAILING DATE of this communication appears on the cover sheet with the correspondence address							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
 Responsive to communication(s) filed on <u>24 August 2006</u>. This action is FINAL. 2b) ∑ This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i>, 1935 C.D. 11, 453 O.G. 213. 							
Disposition of Claims							
4) Claim(s) 10-19 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 10-12 and 19 is/are rejected. 7) Claim(s) 13-18 is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.							
Application Papers							
9) ☐ The specification is objected to by the Examiner. 10) ☑ The drawing(s) filed on 16 March 2006 is/are: a) ☑ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.							
Priority ur	nder 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is in response to the communication filed 8/24/2006.

Response to Arguments

2. Applicant's arguments with respect to the pending claims have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 10, 11, 12, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by (JP 49-124508 A) ('508).

As to Claims 10 and 19,

'508 discloses a stator provided with a one-phase excitation windings, a rotor having salient poles, wherein the two-phase output windings are wound around a plurality of teeth of the stator ((Figure 4) and (the single page English description of the above reference provided by Applicant).

'508 does not explicitly disclose respective numbers of turns of the two-phase output windings are obtained by using m-phase windings, where m is an integer of 3 or more, the m-phase windings being defined in advance to convert the numbers of turns of the m-phase windings into those of two-phase windings.

However, "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). (See MPEP 2113).

Therefore, since '508 discloses the structure claimed in claim 10 as disclosed above, the claim is unpatentable over '508.

With regard to the '508 reference, please note the last 5 lines of page 1 of Applicant's specification.

As to Claim 11,

'508 does not explicitly disclose when the numbers of turns of the m-phase windings, where m is an integer of 3 or more, are converted into two-phase windings, the conversion is performed according to the following expression:

$$N_{ci} = k \sum_{n=1}^{m} N_{ni} \cos(\gamma + \frac{2(n-1)}{m}\pi)$$

$$N_{fi} = k \sum_{n=1}^{m} N_{ni} \sin(\gamma + \frac{2(n-1)}{m}\pi)$$

where γ represents an arbitrary constant, k represents an arbitrary constant excluding zero, a subscript I represents a number of a tooth, α and β represent two-phase windings after conversion, and n represents nth phase before conversion, $N_{\alpha l}$ and $N_{\beta l}$ represent the number of turns of the α -phase and β -phase windings in an ith tooth,

Application/Control Number: 10/510,486

Art Unit: 2862

respectively, and N_{ni} represents the number of turns of the nth phrase winding of the ith tooth.

However, "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). (See MPEP 2113).

Therefore, since '508 discloses the structure claimed in claim 10 from which claim 11 depends, as disclosed above, the claim is unpatentable over '508.

As to Claim 12,

'508 discloses the number of teeth of the stator is 3n, where n is a natural number (Figure 4).

Allowable Subject Matter

- 5. Claims 13-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- The following is an examiner's statement of reasons for allowance:
 As to Claim 16,

The primary reason for the allowance of claim 16 is the inclusion of the number of teeth of the stator is twelve, and shaft multiple angle is 4 or 8. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Schindler whose telephone number is (571) 272-2112. The examiner can normally be reached on M-F (8:00 - 5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on (571) 272-2180. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2862

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
